

# WTUN Climate Action Hackathon 2023

The climate crisis represents one of the greatest existential threats of our time. Now is the time to work together, across borders and boundaries to innovate and find solutions to create a cleaner, greener and more equitable, resilient future.

## Collaborate & Innovate To Tackle The Climate Crisis

13 CLIMATE  
ACTION

17 PARTNERSHIPS  
FOR THE GOALS

Working in teams, you will have 48 hours to work with students across the world to create a new product or service to solve a climate change issue. You will share knowledge, learn something new, create friendships, and nurture innovation and entrepreneurship skills and mindsets. Throughout the Hackathon you will have a number of tasks alongside a schedule of masterclasses to help you develop your idea and enhance your skills. This will culminate in a final pitch presentation to a panel of experts.

### How?

Your university is part of the World Technology Universities Network and along with students from 19 other WTUN Universities across 15 countries, you can participate in this event for free.

The Hackathon is a 48 hour event, where passionate students work together in teams, share ideas, and help each other build innovative solutions. It's a fantastic opportunity to meet new people, learn something new, create something new and have fun.

Prizes will be awarded to the winning team.

WTUN Climate Action Hackathon  
Pre-Event: 23 August 2023

WTUN Climate Action Hackathon:  
12-14 September 2023
