First meeting

When I first arrive there in GNU. The people welcomed me very well. They were very nice and kind to me. I was so appreciatively with them. We got to know with each other. Talking a lot, Sharing experience with each other.

First dinner we go to Pork grill resteraunt together. Korean friend ,They take care of me everything. I was so impressively. They were so kind.

Life style

The life style in korea was very different when compare with Thailand. We have to be hurry for anytime when we walk or doing something. Everything was productive however I think it good for me. Because I can adapt with this behavior and make me grow up.

The most importance of korean people is the time. Because we need to be in time when we have an oppointment to do. And nobody have to wait for us. This was seriously in Korea. Not everyone are not friendly or kind . Just case bu case.

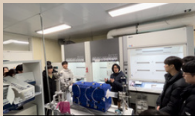

Korean people was driving to fast but not exceeding the law. For example when we on the road and no cars stay in front of us, we need to accelerate until we reach the point.

Sightseeing

On the second day in GNU. I have an opportunities to travel or sightseeing around the university. The first place was laboratory of the material science or institute of engineering including with Polymer , Metallurgy and Ceramic. It was an eyes opening experience to see the advance machines to produce of any material. And we go to the animal hospital. It's in the university. That was so cool.

On the third day. We went to Posco company. It was a huge Korean steel making company. The factory was so big. So we have to sightseeing around the factory by bus. That was incredible to see an enormous company.

Activities

We have a lot of activities to do. For example group working , Lecture. In group working we have to create the ideal about Biomaterial for the hospital and we have to do the presentation. However we do as a team work and got a great results.

Food

I really like this topic because korea food was so delicious. I love it every meal every manu that we got.

Every meal Korean people like to eat the food with side dishes. Like a Kimchi , Soup , korea spicy sauce including with vetgetable
