DISCUSSION BY TOPIC
3. LAB TOUR ABOUT MATERIALS SCIENCE AND ENGINEERING
4. GYEONGSANG NATIONAL UNIVERSITY COLLEGE OF
VETERINARY MEDICINE
5. POSCO GWANGYANG STEEL WORKS

ACTIVITY AT GNU

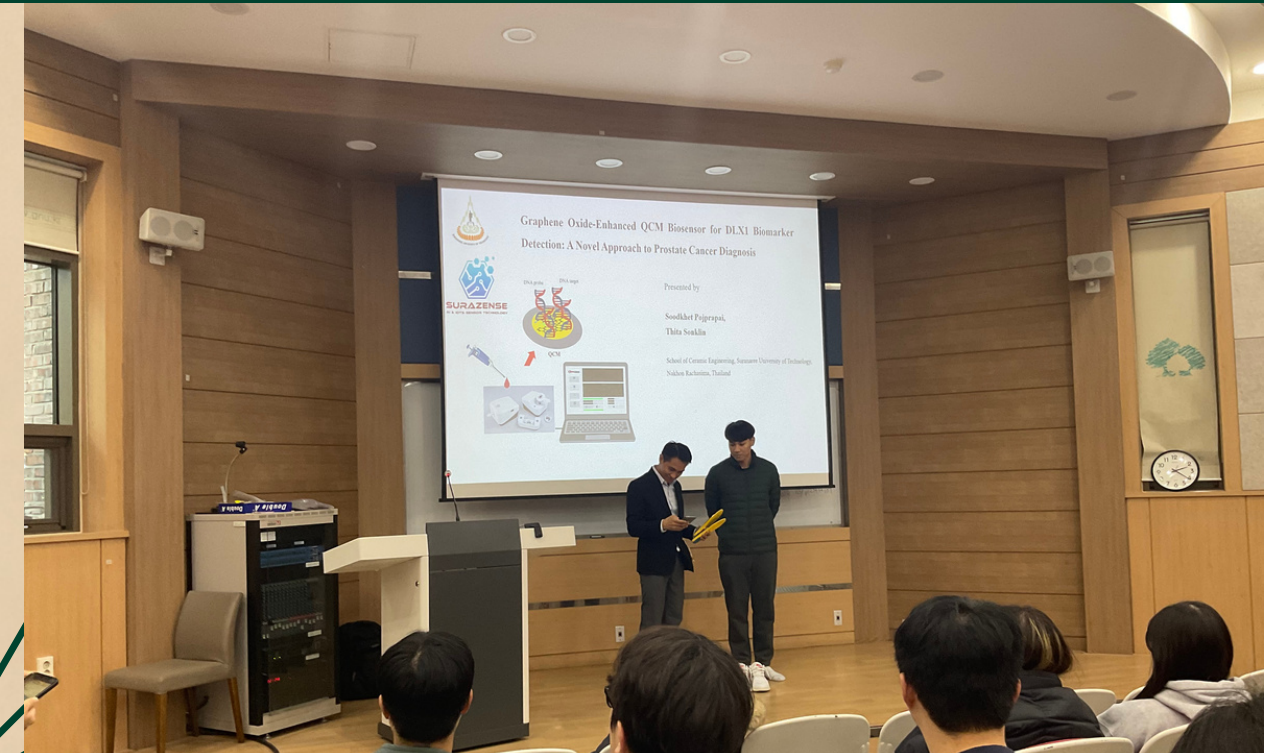

CAPSTONE PROJECT 2024

Start your first day at GNU by dividing into groups to work on projects. First time entering the classroom I'm very excited. Everyone welcomed us from SUT very well and the friends in the group were very nice. Take good care of Until I didn't behave myself properly.

After that, we began to propose ideas for assigned projects. There is an exchange of ideas with each other.

And special lectures from professors from SUT regarding polymer materials and about design ideas and thought processes to be further applied to projects

Thank you for special lecture
Prof. Soodkhet Pojprapai
Prof. Tatiya Trongsatitkul

ACTIVITY AT GNU

CAPSTONE PROJECT 2024

The next activity was a visit to the materials science laboratories such as metallurgy, ceramics, and polymers, followed by a visit to the animal hospital.

And went on an off-campus activity to visit Posco Company, a large company with a long history in South Korea. Posco is a steel manufacturing company. This factory is a very large factory, so we had to take a bus to tour and see the steel production process inside the factory.

THANK YOU

FOR READING

CAPSTONE PROJECT 2024 GNU - SUT

It was a very good
experience visiting
GNU. Thank you for
your warm welcome.

Thank you for this wonderful journey.

Good Times

Good Trips

Good memories
