ABOUT MOBILITY PROGRAM

This program provides a space for universities in Southeast Asia to build formal partnerships, strengthen relationships, and create long-term networks. It focuses on how universities can use technology and innovation to solve environmental, economic, and social problems. Institutions can also use this event to discuss joint research and exchange programs for students and lecturers. Overall, participants will gain valuable experience in working with international teams and learning best practices from other campuses.

DAY 1-DAY 7

(Online ,Group work and Presentation
Q&A)

My Love

The UMDP program begins on **Day 1** with a welcome ceremony for international participants, followed by an introduction to the program's activities and a lecture on "Entrepreneurship and Sustainability or Local Business Wisdom."

Day 2 focuses on "Using AI to Make Prototypes," equipping students with practical knowledge for their group projects.

On **Days 3 and 4**, students work in teams to prepare presentations on applying AI for practical benefits, competing to qualify for the Top 5.

Day 5 features the Top 5 team presentations accompanied by a Q&A session with the faculty members. Finally, on Days 6 and 7, the Top 5 teams refine their work and deliver their final presentations at UMDP to determine the Top 3 winners.

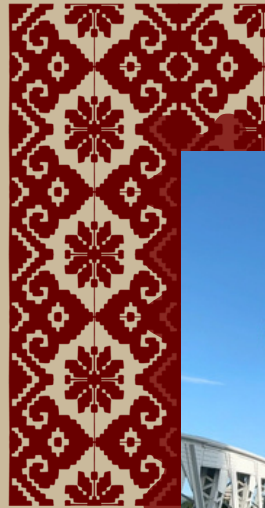

DAY 8

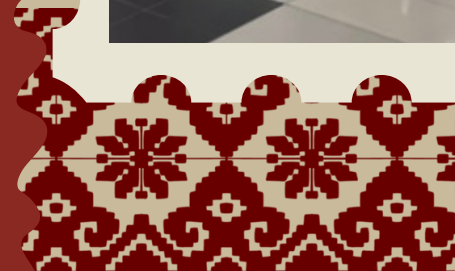

Travel to Palembang & Dinner

- Travel to Palembang and end the day with a group dinner.

However, we set off on the 7th and arrived in Singapore on the 8th, spending 20 hours there. After that, we took a 1-hour connecting flight to Palembang, arriving at 8:50 PM. And upon arriving at Palembang Airport, we were warmly welcomed by the project's organizing committee.

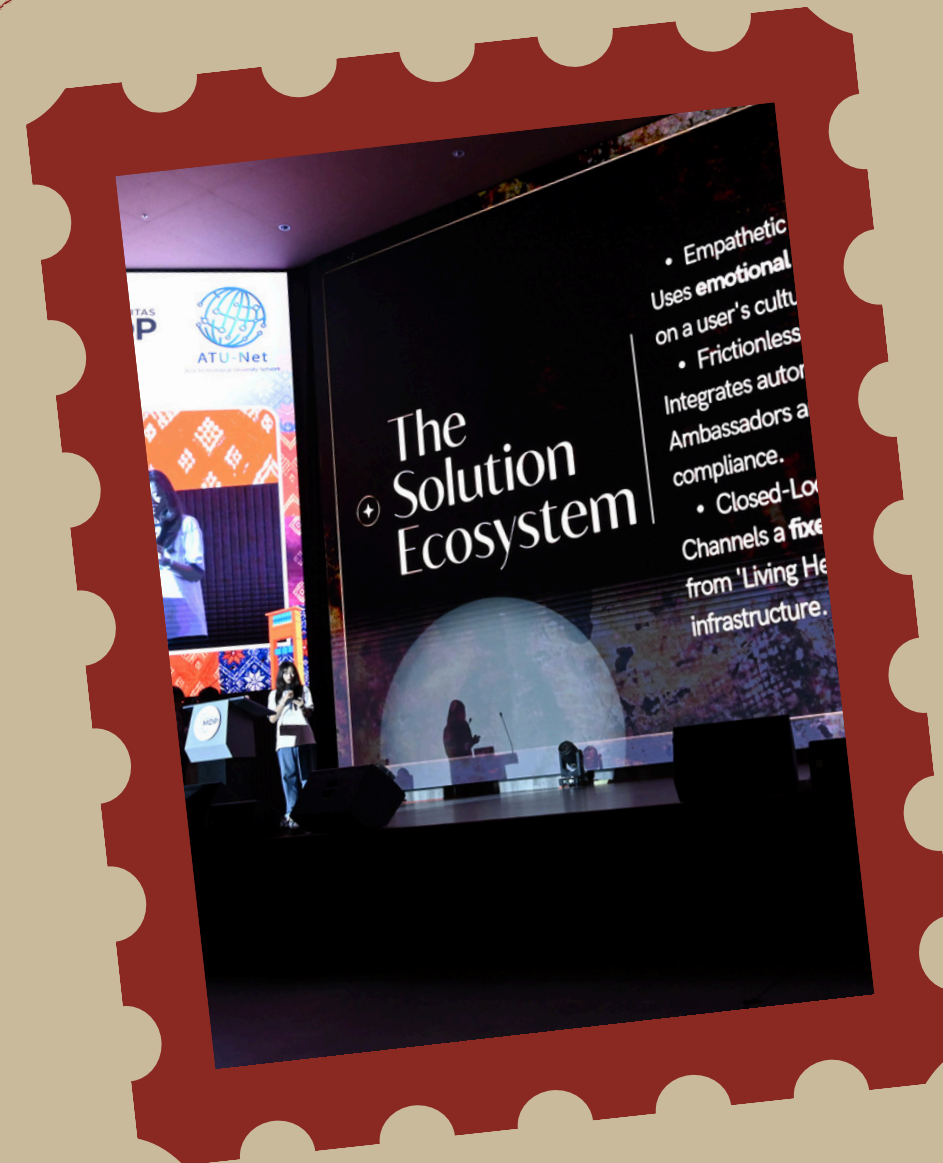

My Love

DAY 9

(Offline Co host Univ)

On Day 9, we held an in-person kick-off event at UNDP. The agenda began with an opening dance performance, the Indonesian national anthem, and introductions of the committee and academic staff. Next, we had a group presentation activity where teams presented on stage to compete for the top three spots. Although our team didn't make it to the top three, I'm proud that we did our best. Finally, we had lunch together, and the event concluded at 3:00 PM.

DAY 10

(Offline SME or Company)

On 10 day, the itinerary featured a Palembang city tour covering four key locations: 1. Sentra Songket, 2. Sultan Mahmud Badaruddin II Museum, 3. Riverside lunch, and 4. A Pempek-making workshop. The evening concluded with a closing dinner and ceremony, which included traditional dance performances and a video recap of the activities. International representatives delivered speeches of gratitude and congratulations, officially bringing the program to a successful close. The event wrapped up with a group dance celebration.

SENTRA SONGKET

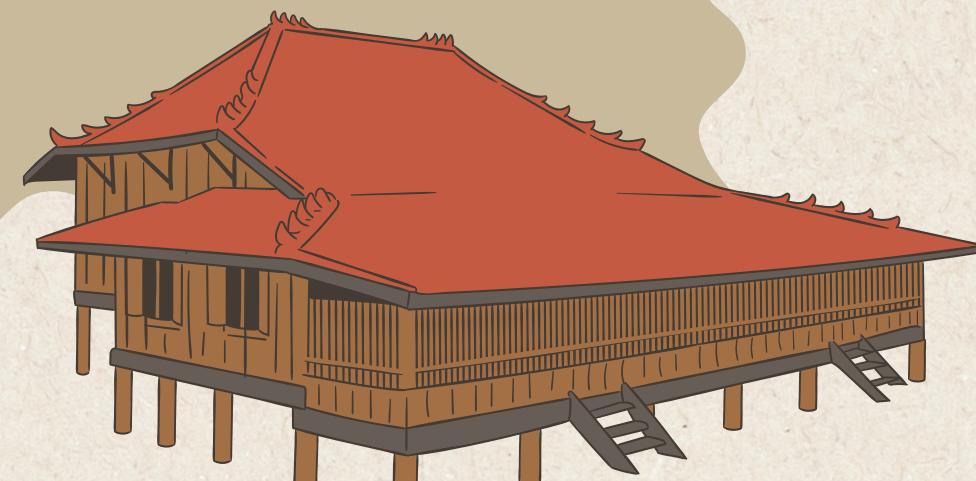

Songket is a traditional, hand-woven fabric deeply rooted in South Sumatra's history, dating back to the Srivijaya Kingdom era. It is distinguished by its intricate patterns woven with gold or silver threads into silk, giving it a luxurious and shimmering appearance.

MUSEUM SULTAN MAHMUD BADARUDDIN II

My Love

Located on the banks of the Musi River, this museum stands on the historical grounds of the former Palembang Darussalam Sultanate royal palace. After being destroyed during the Dutch colonial era, the present structure was rebuilt in 1823, featuring colonial-style architecture combined with traditional Palembang Limas roof elements.

RIVERSIDE LUNCH

spanning over 750 kilometers, the Musi River is the longest river in Sumatra and has served as the lifeblood of Palembang's economy, trade, and culture for centuries. Due to its extensive network of waterways, Palembang was historically dubbed the "Venice of the East."

A PEMPEK- MAKING WORKSHOP

Pempek is a savory Indonesian fishcake made from minced fish meat and tapioca starch, which is boiled or deep-fried and served with a tangy, sweet, and spicy dark sauce called Cuko (made from palm sugar, garlic, chili, and tamarind or vinegar).
