

Lunch with MoE

SUT was honored at a luncheon hosted by Dr. Yu-Juan Lee, Director General of Department of International and Cross Strait Education (DICE), MOE. Attendees included officials from DICE and presidents from Yuan Ze University, Lunghwa University of Science and Technology, and Taipei Tech, fostering warm dialogue on deepening Taiwan-Thailand academic collaboration.

Strengthening Taiwan-Thailand Higher Education Ties: SUT Delegation Visits Taiwan Tech Universities

From June 2–6, 2025, the Ministry of Education (MoE), Taiwan, hosted a delegation from Suranaree University of Technology (SUT), Thailand. Organized by Ms. Tina Ou, Education Attaché, the visit aimed to strengthen academic and research cooperation. The delegation was led by Rector Assoc. Prof. Dr. Anan Tongraar and included Vice Rector for Engagement, Innovation and Entrepreneurship, Deans from the Institute of Engineering and the Inst of Digital Arts and Science, and the Director of the Center for International Affairs (CIA). Dr. Pojanath Bhatanacharoen, Executive Director of the Swedish Chamber of Commerce Taipei, also joined as CIA board member. The visit focused on collaboration opportunities in semiconductors, creative technologies, biomedical innovation, and student mobility with key Taiwanese universities and research partners.

National Taipei University of Technology

On June 3, 2025, the SUT delegation visited National Taipei University of Technology (Taipei Tech) in Taipei, Taiwan. The team was warmly welcomed by senior Taipei Tech administrators, including Vice President Prof. Shih-Hsuan Yang and deans from key offices.

The SUT delegation also learned about the innovative iFirst Interdisciplinary College, which bridges engineering, business, and design to produce industry-ready graduates. This flexible and cross-disciplinary approach aligns with SUT's own goals of preparing talent for the future economy.

This strategic exchange set the foundation for potential collaboration in semiconductor education, smart manufacturing, joint research, and dual-degree programs, supporting the long-term vision of regional innovation partnerships between Thailand and Taiwan.

Lunghwa University of Science and Technology

On June 3, the delegation visited Lunghwa University of Science and Technology (LHU), meeting with President Prof. Ko and international affairs leaders. They toured key labs including semiconductor, 5G,

PCB manufacturing, and multimedia centers, identifying collaboration opportunities in INTENSE programs, industrial talent training, and joint research in electronics and digital technologies.

Kaohsiung Medical University

One June 4, the visit included mutual introductions between KMU and SUT, followed by a discussion on potential academic and research collaborations. After a luncheon at Fukelai Restaurant, the delegation toured the KMU Museum.

National Sun Yat-Sen University

On June 4, the delegation visited NSYSU and met with senior leaders to discuss collaboration in science, technology, and student mobility. Key topics included the joint research, dual degrees, and academic exchanges across chemistry, medical science, and computer science.

National Cheng Kung University

On June 5, SUT visited NCKU to explore collaborative opportunities in biomedical engineering, digital health, and medical device innovation. After welcome remarks and institutional introductions, both sides discussed joint research, academic exchanges, and student mobility. The visit concluded with lab tours of the Bioimaging Core Facility, College of Medicine, and Medical

Device Innovation Center (MDIC), highlighting potential for future partnerships in translational health research and smart healthcare technologies. An MOU was signed between NCKU's Taiwan-Thailand Science and Technology Center (TTSTC) and SUT.

I-Shou University

On June 4, the group visited I-Shou University, touring the Medical Campus and main campus facilities. The visit included a welcome speech, university introduction, campus tour and discussions on cooperation. The

two institutions agreed to formalize the collaboration with the ISU-SUT MOU in process. The day concluded with a campus tour and official dinner hosted by ISU President Dr. Yuan-Kuang Guu.

National Kaohsiung University of Science and Technology

On June 5, SUT visited NKUST to explore collaboration in intelligent mechanical systems, engineering, and entrepreneurship. Both sides introduced key academic programs in engineering, mechatronics, and innovation. Potential synergic areas

include joint research such as in Joint research in intelligent mechanical systems, renewable energy, smart manufacturing, student exchange, and entrepreneurship. The visit included with lab tours and networking. An MOU is in process.

Yuan Ze University

On June 6, SUT visited Yuan Ze University to explore collaboration in engineering, digital arts, and smart manufacturing. Both universities shared academic strengths, discussed joint research and exchange opportunities, and concluded the visit with a gift exchange and photo session, affirming future partnership potential.
