

CIA and Technopolis Collaborate to Welcome OPTICEPT

ON FRIDAY, AUGUST 22, 2025,

The Center for International Affairs (CIA) and Technopolis welcome OptiCept Technologies to SUT. The program opens with an overview from CIA, Technopolis, and OptiCept representatives, followed by a special talk by Mr. Anders Hattmark, who shares “The OptiCept Journey”—a deep dive into precision technologies such as pulsed electric field (PEF) and vacuum infusion (VI), and their impact on food quality, sustainability, and shelf life.

Afterwards, CIA, TN, and experts from the Institute of Agricultural Technology join fruitful collaboration discussions with OptiCept and plan for future collaboration. The afternoon then continues with a networking lunch and lab visits to the Biorefinery Pilot Plant and the Food Technology Lab
