

INNOVATION MEETS SUSTAINABILITY AT SUT

Midsummer Delegation Visits SUT to Explore Green Innovation Partnership

Nakhon Ratchasima, June 19, 2025 – Suranaree University of Technology (SUT), in collaboration with the Center for International Affairs and Technopolis, proudly welcomed a delegation from Midsummer, a leading Swedish company in thin-film solar technology, for a strategic visit aimed at promoting green innovation and international research collaboration.

The delegation, led by **Mr. Lars Svensson**, Head of Strategic Partnerships and Business Development – ASEAN, visited SUT to explore cooperation in solar energy solutions and sustainable forestry development. Particular interest was shown in areas such as reforestation, low-impact production, and opportunities for green exports from Thailand.

The program began with an introduction to SUT's academic and research capabilities, followed by presentations from Technopolis and Midsummer. Mr. Svensson delivered a keynote address on Wood Value Chain System Change and Midsummer Solar Solutions, highlighting the company's approach to sustainability and circular economy practices. The morning session was attended by SUT researchers, lecturers, and students from various institutes, offering a platform to exchange perspectives on sustainability-driven innovation.

In the afternoon, focused discussions took place between the Midsummer delegation and SUT researchers and institute representatives. These sessions explored areas of mutual interest, including the potential for future joint research and pilot initiatives.
